

Vulnerability Report

Web Application Penetration Testing Report

IP: 172.110.101.107 (Staging).

Scope of Penetration Test

Domain	Netreo
Test IP / Application	172.110.101.107
Time frame	NA-

Vulnerability Level Classification

Risk Level	Description
Critical	Critical Risk vulnerability need to be fixed immediately.
High	High Risk vulnerability can be exploited by an intruder to get full
	administrative access to the application or its primary operating system.
Medium	Medium Risk vulnerability discloses information about the application and its
	underlying communications that can be used by an attacker in conjunction
	with another vulnerability to gain administrative power on the application or
	its primary operating system
Low	Low Risk vulnerability can result in inventory of vital information held by or
	about the application or its primary operating system
Info	Info Information that doesn't necessarily have a CVSS score or real risk, such
	as installed software, open ports, and general information about what a
	system.

Summary of Test Result
